- Name and Caller ID

Product highlights

Plug & Play pack - 2 handsets
A convenient Plug & Play DECT-phone package including a base and 2 handsets.

Free intercom
No need to stop what you are doing and go to give the handset to your son when his friend calls: you can freely and easily call the handset in his bedroom and transfer the call.

Phone-number display
The number of the person you want to call is displayed on the telephone display. You can verify it before seizing the telephone line.

Keypad lock
How convenient it is to take your DECT phone with you whilst gardening. But in your pocket it can be so jolted that a key might be accidently pressed. To prevent inadvertently calling your cousin in the US, the keypad lock is a safe way to avoid bad surprises on your next phone bill!

Paging key
Instead of looking in every corner of the house, simply call the handset from the base by pressing the dedicated key on the base station and the handset lets you know where it is hiding.

Crystal Clear Sound Quality
The use of digital communication virtually eliminates interference, buzzing and hissing. It improves the intelligibility of messages left on the answering machine and even making it possible for users to record and reproduce music.

Instrumental ringtones
Instead of the traditional aggressive "buzzer" ringers, instrumental melodies are a more pleasant way to let you know when someone is calling.
